London based software developer and enthusiast

Experience

The Peoples Operator

RoR developer (full stack) · Mar 2015 to present · London · **https://www.thepeoplesoperator.com/**

Building US store site. Greenfield project.

AppearHere

RoR developer (full stack) · Oct 2014 to Jan 2015 · London · https://www.appearhere.co.uk

Working as a part of small agile team on various aspects of the site: searching for places, booking places, landlord onboarding, admin backend and more. Rails 4, Postgres/ElasticSearch, jQuery, Heroku. TDD (rspec), pair programming.

shopa

RoR developer (full stack) · Jun 2012 to Aug 2014 · London · https://www.shopa.com

Working on several versions of shopa platform helping the business to find the right one. Rails 3.2/4.1, golang, Postgres/ElasticSearch, Phonegap, Angular/React, jQuery, Heroku/Amazon, Docker/Vagrant. BDD, pair programming. Continuous deployment.

BBC

Developer-in-test · May 2011 to May 2012 · London

Bringing the light of BDD into some of the BBC Future Media projects. Ruby, Java, Cucumber. Pair programming.

Orange Labs UK

RoR developer · Jan 2011 to Mar 2011 · London · http://labs.orange.com

voisinssolidairesmobile.fr : mobile web application to helps people discover and exchange services with their neighbors. Greenfield project. Rails 3.0

Equal Media (currently `state.com`)

RoR developer · Dec 2010 · London

Migrated large (3 years old) core application from rails 2.3 to 3.0.

Orange Labs UK

RoR developer · Nov 2010 to Dec 2010 · London · http://labs.orange.com

Extending existing application – Orange Business Events – preparing it for next major release. The application had (web) mobile version and provided restful api for native mobile client. Rails 2.3.10.

Merjis

RoR developer · Oct 2010 · (remote client)

Developed a webapp infrastructure for my client's custom web marketing tools. The application was built on the latest (as of this writing) rails technology stack (rails3,

ruby1.9.2, rvm), using a number of industry standard libraries (devise, cancan, omniauth, simple_form, haml, jquery, etc), unit tested (rspec, shoulda, factory_girl) and hosted on heroku.

AOL

RoR developer · Apr 2010 to Aug 2010 · London · http://www.aol.co.uk

I was a part of a small agile team, mainly automating internals of AOL advertising business in the UK. That involved supporting existing application suite (adding features and bugfixing) as well as developing brand new applications.

...

Years of Perl and, prior to that, C++ development.

Technical Experience

Languages	ruby, javascript/coffeescript, golang, perl
Frameworks	rails, sinatra, jquery, backbone, angular, react, phonegap, rubymotion
Testing	outside in, BDD, cucumber, rspec, jasmine, mocha, travis-ci/jenkins/wercker
Deploy	heroku, aws/digital ocean, docker
Dev Environment	linux/osx, vagrant, vim, tmux, git
Databases	postgres, elasticsearch, mongodb, mysql, sqlite

Open Source

Projects	REST-assured: mock/stub external http dependencies. Ruby, Sinatra, ActiveRecord, rubygem.
	StarLogs: github project logs - Star Wars crawl style.
	TransOver: simply the best Google Chrome translator extension.
	http://thesmallestrailsapp.com/: the smallest rails app on the planet.
	Oompa-loompa: a handful of bots all twitting links from HN/reddit based on link score (e.g. follow @RProgramming150). Ruby, MongoDB, deployed with docker.
	LJ-friends-feed: produce rss feed of friends' posts. Something that Live Journal never got around to implement for some reason. Deployed here. Ruby, Sinatra, MongoDB, deployed with docker.
	CCCV: finds copy/pastes in a git diff.
	laundrette: customer/order automation for my friends' dry-cleaning shop. Rails 4.1, deployed to heroku.
	DevNot: developer notes with code friendly markdown editor. Rails, Backbone.
	Lots of other tidbits on github
Contributions	Rails
